ChatGPT

app-flow-pages-and-roles.md

Core Pages

1. Homepage

- Intro to the platform
- Highlight featured prompts and tutorials
- CTA: "Start Prompting" or "Explore Library"

2. Prompt Builder

- Core editor to create, test, and tweak prompts
- Choose model (ChatGPT, Claude, Gemini)
- Run prompt → view output → save/remix

3. Prompt Library

- Personal and public prompts
- Filters: model, tags, use case
- View prompt cards or full-page detail

4. Prompt Detail Page

- Full prompt content + metadata
- Outputs and test history
- Comments + remix button

5. Search & Explore

- Keyword search
- Filters by model, category, trending, difficulty

6. Tutorials and Learn

- Curated guides and video walk-throughs
- Beginner, intermediate, and pro levels

7. User Dashboard

- Saved prompts, activity, usage stats
- Plan details (Free vs Pro)

8. Login / Signup

- Social login (Google, GitHub)

9. Admin Panel

- Moderate content, view usage logs
- Manage featured and flagged prompts

User Roles and Access Rights

Free User

- View and test up to 5 prompts
- Browse library, tutorials
- No saving/remixing past limit

Pro User

- Unlimited prompt testing and saving
- Access all models and features
- Save collections, remix prompts

Admin

- Full access to moderation tools
- Feature or flag content
- Manage platform-level API usage

User Flow Summary

1. Visitor lands on homepage
2. Logs in via social login
3. Enters prompt builder or explores prompts
4. Tests a prompt using live model access
5. Saves/remixes or shares prompt (Pro only after limit)
6. Learns from tutorials and community examples
